- MYSQL,MONGODB
- Leadership
- Effective Communication
- Critical Thinking

PROFILE

I am a BCA graduate with a strong foundation in full stack web development. I can build both the frontend and backend of web applications using HTML, CSS, JavaScript, React.js, Node.js, and MongoDB/MySQL. I have experience in creating responsive user interfaces, developing APIs, managing databases, and implementing authentication (JWT, OAuth). I am also familiar with Git for version control and deploying websites on platforms like Firebase and Vercel. I enjoy learning new technologies and working on real-world projects to improve my skills.text

WORK EXPERIENCE

TORSECURE CYBER LLP
Web-Developer Intern

MAY 2024 - PRESENT

- **Personal Portfolio Website**

Designed and developed a fully responsive portfolio website using HTML, CSS, and JavaScript to showcase my skills, projects, and achievements. The website features an interactive user interface, smooth animations, and a contact form for easy communication. I implemented media queries to ensure a mobile-friendly experience and optimized the website for better performance and loading speed.

- **Gym Website**

Created a modern and user-friendly gym website using HTML, CSS, and JavaScript, featuring an engaging homepage, membership plans, workout programs, and contact forms. The website includes interactive UI components, hover effects, and animations for an enhanced user experience. Additionally, I optimized the layout for mobile and desktop devices to ensure accessibility for all users.
